**IPL: A unique Pôle d'Excellence**

At the heart of Lyon's dynamic city, Institut Polytechnique de Lyon brings together four leading engineering schools renowned for their academic excellence, their openness to the professional world and their commitment to innovation. Joining one of our schools means joining a solid network, benefiting from cutting-edge teaching methods and preparing to meet the challenges of tomorrow. Whether your passion lies in chemistry, digital sciences, biotechnology, mechanical or industrial engineering, agronomy and the environment, or textiles, materials and leather, IPL has the right school for you.

**Key features :**

- French and English courses accessible to international students
- Personalized support for the successful integration of international students
- A technical and practical approach linked to industries and companies
- A varied and committed network of student associations (sports, cultural, humanitarian)
- The cultural richness and opportunities offered by the Lyon metropolitan area, France's 2nd largest student city
- All English-taught programmes lead to an internationally recognized degree equivalent to a Master of Science (MSc)

**CPE Lyon**  
Engineering in Chemistry, Digital Science and Biotechnology

CPE Lyon offers seven study programmes across three major fields: Chemistry & Process Engineering, Digital Science, and Biotechnology. The school combines cutting-edge research, strong industry connections, and extensive internships to provide students with a comprehensive and hands-on education.

**ECAM LaSalle**  
A Humanist DNA and Performance Engineering

A generalist school, ECAM LaSalle trains engineers and technicians who put their scientific expertise at the service of an ethical and sustainable future and adapt to the complex challenges of the business world.

**ISARA**  
A school at the heart of agricultural and food transitions

ISARA Lyon is the benchmark school for training experts in agriculture, food and the environment.

**ITECH Lyon**  
Polymer Chemistry at the Core of Industrial Applications

The Master of Engineering in Applied Chemistry at ITECH Lyon trains future engineers in applied polymer science across Formulation Chemistry, Plastic Materials, Leather Technology, and Textile Materials. Taught in English, the program blends scientific expertise with hands-on lab sessions and real-world industrial applications.

School	Programmes in English	Duration	Main topics/subjects	Academic background
CPE	<a href="#">European Biotechnology for Sustainability</a>	3 yrs	Biotechnology Bioprocessing	2-3 yrs University level studies in Biology, Biochemistry or Chemistry
ECAM LASALLE	<a href="#">ECAM Engineering, specialising in Mechanical and Electrical Engineering</a>	5 yrs	Mechanical and Electrical Engineering	Engineering, sciences or mathematics Entry possible in Year 1, 2, 3 or 4
ISARA	<a href="#">MSc Agroecology</a>	2 yrs	Agroecological practices, food systems, transitions	All students having a BSc degree or equivalent based on 180 ECTS in agriculture, horticulture, ecology, biology, economics, food sciences, rural sociology or other fields related to agriculture or the food sector may apply for this course.
	<a href="#">MSc Sustainable Food systems</a>	2 yrs	Sustainable food processing, life cycle assessment, corporate social responsibility	BSc degree in food science & technology or nutritional sciences or an equivalent degree with an EQF level 6 or an equivalent based on 180 ECTS.
	<a href="#">MSc Sustainable Trade for Agriculture and Food Industry</a>	2 yrs	Agroeconomics, Ethical business, Global food trade	BSc degree (or an equivalent based on 180 ECTS) in agronomy, life sciences, environment as well as economics and management
ITECH	<a href="#">Master of Engineering in Applied Chemistry</a>	2 yrs	Chemistry & Applied Polymer Chemistry (Formulation Chemistry, Leather Technology, Plastic & Textile Materials)	4 yrs of University level Chemistry Studies

An advanced level of English (equivalent to B2) is required for admission to English courses. Language level will be assessed during an interview.
